

## Overview:

Your ever-changing dynamic business needs - your customers' requirements and preferences - often require you to create reports on the fly.

Our 'simply sophisticated' **Matrix Quick Reports** allow you to capture your data in a customized report or get a simple answer to a question ... in just seconds.

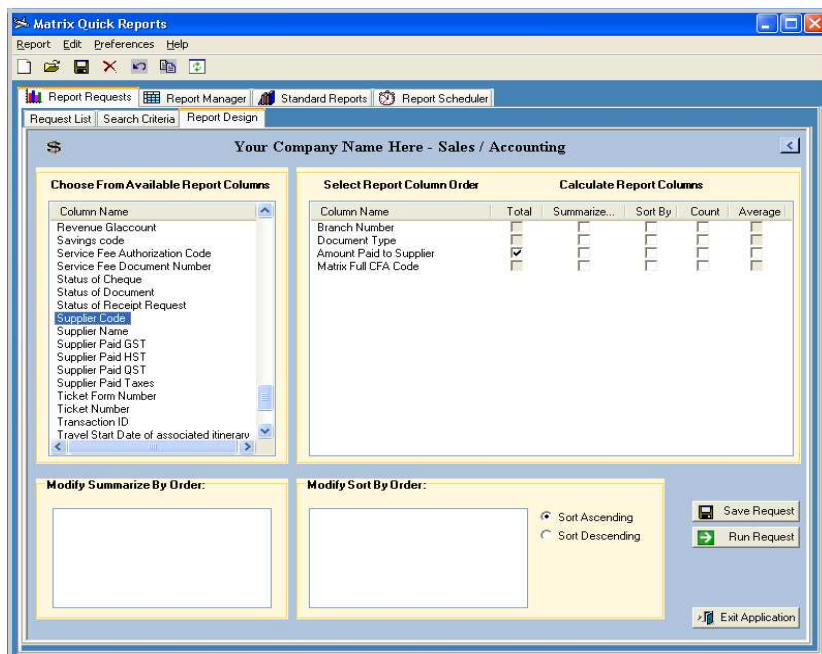

## Proven Benefits:

- **User friendly** query tool requires no formal training.
- Data is **accurate to the moment**... within four seconds of reaching the Matrix transaction database.
- Report query library and scheduler **saves time** when you need to run the report again.

## Key Features:

- Small PC application that **takes up very little space** on the desktop and communicates to the central database **through the Internet**;
- **Immediate business statistics** critical for making informed operational decisions;
- **Real time** data provides precise information **on demand**;
- **Set data selection criteria and determine output design** to meet your requirements;
- **Secure**;
- **Canned or custom reports and scheduling capability**; and
- **Export data** in Excel, HTML, Text or XML.

*"MatrixqR is years ahead of other query tools."*
